LOOK WHO WON!

Magdielle Lawson Koudahin likes to play various lottery games with her father. However, it was the ticket she bought by herself that ended up winning $250,000 in the Virginia Lottery’s Bank a Million game.

The Winchester woman matched all six numbers in the May 30 drawing. Since she split her $2 wager four ways when she bought the ticket, she had four sets of numbers. Using that “Play Your Way” feature, she won $250,000 on one of her sets of numbers. She bought the winning ticket at Martin’s Food Store located at 200 Rivendell Court in Winchester.

The top prizes in Bank a Million ($1 million, $500,000 and $250,000) are calculated so that winners receive the prize amount after federal and state tax withholdings. Bank a Million drawings are Wednesdays and Saturdays at 11 p.m., and the game is played exclusively in Virginia. Players can win anywhere from $4 up to the $1 million prize with a $2 ticket. The odds of winning the top prize are 1 in 3.8 million. The odds of winning any prize are 1 in 18.3.

Now in its 30th year, the Virginia Lottery generates more than $1.6 million per day for Virginia’s K-12 public schools. Operating entirely on revenue from the sale of Lottery products, the Lottery generated more than $600 million for Virginia’s public schools in Fiscal Year 2018.

SECURITY CORNER

1. You must properly validate all tickets on the terminal before cashing.
2. Do not accept a copy, a picture, or the ticket number written down on a piece of paper.
3. Warning to retailers: Do not cash tickets without first scanning them.

Scan every ticket before cashing it. There are individuals approaching retailers in nearby states with altered tickets. These individuals approach with high-value tickets, while the lottery system is down, and offer to sell them to the retailer at a discount. Do not accept this offer. If you do, your Lottery license will be in jeopardy for discounting, and you’ll lose the money given to the individual.
